

GILBERT CHERUIYOT TANGUS

Software Developer | Python, TypeScript, REST APIs, AI Integrations

Nairobi, Kenya | gilbertofke@gmail.com | +254 716 975 108 | linkedin.com/in/gilbert-cheruiyot | github.com/gilbertofke

SUMMARY

Software developer with three years of production experience building web applications, REST APIs, and AI-powered systems in Python and TypeScript. Built a learning management system used by more than 200 learners (Python, Next.js, TypeScript, AWS) and the React chat interface and Django backend for conversational AI tools serving e-commerce platforms. Now lead the architecture of a multi-tenant AI agent platform using FastAPI, PostgreSQL, Redis, and LLM agents grounded in business data through RAG. Experienced with third-party integrations, Docker, AWS deployments, and CI/CD, with a focus on secure, maintainable, tested code that solves real business problems. AWS Certified Cloud Practitioner.

EXPERIENCE

Systems Engineer, AI Agent Platform | April 2026 to Present

Finlanza, Nairobi, Kenya (Remote)

- Lead architecture and engineering of a multi-tenant AI agent platform that turns fragmented business data into operational intelligence across Finance, Sales, and Operations.
- Designed and implemented a RAG data layer over Zoho Books, CRM, Projects, and Creator using Qdrant with payload-based tenant isolation, so agents answer from accurate, scoped data.
- Built event-driven and scheduled AI agents with cost-governed LLM usage and fallback strategies for production reliability.
- Authored architecture decision records covering multi-tenant vector isolation, embedding model selection, PostgreSQL row-level security, tenant-scoped Redis keys, and HMAC-based service-to-service authentication.
- Integrated with Zoho Books, CRM, Projects, and Creator APIs, and enforce quality through automated tests and a verification standard that requires documented evidence before work is marked complete.
- Found and fixed a secrets-scanning CI workflow that gave no real coverage, and led structured pull request reviews across the platform's core capabilities.

Full Stack Developer (previously Frontend Developer) | August 2024 to May 2025

AReL, Action for Refugee Life, Turkana County, Kenya (Contract)

- Built end-to-end solutions for the organisation, including a learning management system used by more than 200 learners to study digital skills, handling courses, enrolment, progress tracking, and assessment, using Python, Next.js, TypeScript, and AWS.
- Progressed from Frontend Developer to Full Stack Developer over a ten-month engagement, building and maintaining front-end and back-end features across client-facing and internal tools.

Site Reliability Engineer | August 2024 to March 2025

Ablestate, Kampala, Uganda (Remote, Part-time)

- Maintained uptime, performance, and security across AWS EC2, Plesk, and Contabo VPS infrastructure, and hardened Linux servers.
- Implemented CI/CD pipelines; managed EC2, VPC, S3, IAM, Auto Scaling, and Load Balancers while optimising for cost.
- Integrated Coolify for automated deployment, Appwrite for backend services (auth, storage, APIs), and Strapi as a headless CMS.

DevOps Engineer | February 2025 to March 2025

InspireCraft Global, London, United Kingdom (Remote, Contract)

- Applied DevOps practices and AWS CloudFormation to support infrastructure-as-code automation work.

Full Stack Engineer | June 2023 to May 2024

Elloe AI, San Mateo, California, United States (Remote)

- Built the React chat interface and the Python Django backend for conversational AI tools serving e-commerce platforms, on a US-based engineering team.
- Worked across the AWS infrastructure behind the product alongside full-stack feature development.

Technical Mentor | May 2023 to September 2023

Learning Lions, Lodwar, Turkana County, Kenya (Remote, Contract)

- Taught students front-end web development and UI/UX design, covering HTML, CSS, JavaScript, React, and Figma.

Cloud Engineer (Internship) | February 2023 to May 2023

Cecure Intelligence Limited, United Kingdom (Remote)

- Gained hands-on experience in DevOps practices and Google Cloud Platform infrastructure.

SKILLS

Languages and Frameworks: Python, FastAPI, Django, TypeScript, JavaScript (ES6+), React, Next.js

Backend and Data: REST API design, third-party integrations, PostgreSQL, Redis, Qdrant vector search, authentication and authorization, role-based access control, PostgreSQL row-level security, HMAC service authentication

AI and Automation: LLM integrations, LangChain, LangGraph, RAG pipelines, multi-agent architecture, prompt engineering, Zoho Creator and Deluge, Zoho Flow, event-driven and scheduled workflows

Cloud and DevOps: Docker, AWS (EC2, VPC, S3, IAM, Auto Scaling, Load Balancers, CloudFormation), Google Cloud Platform, CI/CD, Linux administration

Tools: Git and GitHub, Figma-to-code, automated testing and debugging

EDUCATION AND CERTIFICATION

- **AWS Certified Cloud Practitioner**, AWS re/Start Cloud Computing Training, eMobilis Institute (January 2024 to April 2024)
- **Computer Software Engineering Nanodegree**, Moringa School (April 2022 to November 2022)
- **Bachelor of Science, Microbiology**, University of Eldoret

EARLIER CAREER

Medical Representative, Win-Pharma Ltd (2021) and Eastleigh Pharmaceuticals Limited (2020); Microbiology Laboratory Technician (Internship), KALRO (2017). Transitioned into software engineering in 2022.
